MICKEY
TRUCK BODIES
Route Buddy™

STEPS FOR QUICK & EASY STORAGE

STEP 1 Collapsible arms for smooth no-hassle storage.

STEP 2 Align pivot rail with holding channel.

STEP 3 Push down on opposite end so pivot rail shifts up above holding channel and is able to be rolled into place.

STEP 4 Push Mickey's Route Buddy forward so pivot rail slides over and into the holding channel with no lifting.

STEP 5 Pivot rail tightly holds Mickey's Route Buddy within the holding channel so it's ready to be locked in place.

STEP 6 Mickey's Route Buddy is firmly fastened in place by lock bar. This keeps Mickey's Route Buddy from shifting up and down during the ride.
