

No Bondo. No Rivets. No Caulking. No Cracks.
No kidding.

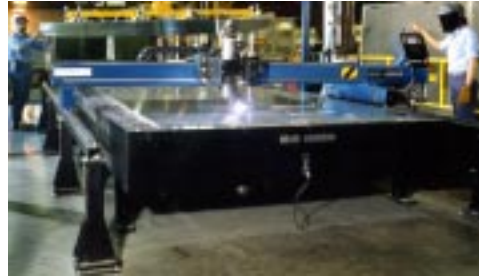

Our rear bulkhead.

"Their" rear bulkhead.

With Mickey's exclusive **one-piece skins**, your beverage graphics will always look clean, crisp and refreshing.

And besides being **more aesthetically appealing**, our one-piece skin is **much more durable**, and will significantly reduce costly repairs due to cracking and popping rivets where two skins are adjoined.

Mickey bulkheads are perimeter-welded only at the top rail and side posts, which means your decal goes on clean and flat and stays that way. If there is an accident that causes damage to the rear of your truck, chances are the repair will be much less costly and far less time consuming than similar damage to a bulkhead held together with rivets. With our all-aluminum, one-piece bulkhead skins, **you'll never have to worry about rust**, either.

Top 10 reasons for a Mickey

- ⑩ 12-year warranty
- ⑨ Lowest cost to maintain
- ⑧ Lock-latch hand truck rack
- ⑦ Lowest working profile (and other driver safety features)
- ⑥ State-of-art-paint facility at all locations
- ⑤ Nationwide network of Recon/Service Centers
- ④ 1-piece (rivetless) bulkhead skins
- ③ All aluminum dock high non-override bumper
- ② Full-length, all-aluminum, adjustable locking system
- ① Interlocking structural castings (all 4 corners)

How do we do it? First, we **research** customer needs. Then we **invest** in our business to deliver workable solutions against those needs. You told us you wanted a **stronger, better looking** beverage body and trailer. **We delivered** both by designing one-piece bulkheads that we produce, on-site, with a computer-driven "plasma" cutter that facilitates aluminum sheet up to 96 by 190 inches.
