

Deliver your

# WATER, WATER EVERYWHERE

with a custom-built body from Mickey.

Whether you deliver bottled water commercially, residentially or up-and-down-the-street; through the front door, from the parking lot, or off a curbside, a custom-built Mickey truck body is the most driver-friendly and efficient way to get the job done. Everything from 8-ounce bottles to 5-gallon containers.

## We don't just design bodies, we design solutions.

Mickey's unique Service Delivery Model combines engineering expertise with a century of vehicle manufacturing innovation to turn your requirements into bottled water delivery solutions. It all starts with a clear understanding of the customer's business objectives and an detailed assessment of the vehicle's operational environment. The final product exceeds expectations for strength, functionality, quality and appearance.

Mickey Truck Bodies stands behind everything it sells with a "Rock Solid" 12-year warranty.

## Standard Mickey Features

### Low-profile design

Allows for the most efficient working height in the industry.

### All-Weather Door LocTM system

Full-length, full-contact extruded locking flap puts constant downward pressure on full width of door panel to minimize roller wear while providing a positive locking system.

### All-aluminum, uni-body construction

Mickey's aluminum bodies enable you to increase your payloads because they are built stronger and lighter than conventional aluminum bodies.

### Full-length, single sheet floors

Integral longitudinal floor stiffeners distribute stress evenly and directly on chassis with a high density rubber pad between body and chassis. "Corrugated" system provides rigid and transverse surface that remains in full contact with product at all times. Floor pitch customized to specs.

### One-piece rear and front panel skins

Eliminates unsightly rivets to allow for rust-free surface and smooth application of decals.

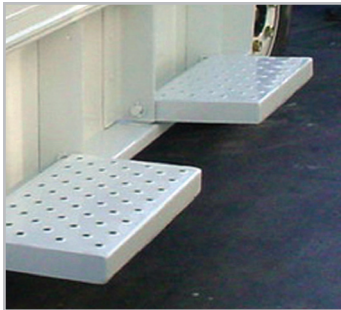

### All-aluminum corner and intermediate machined castings

"Sleeve fitted" to rubrail, door tracks and door post for a positive, stress-free connection to enhance strength and durability of the total unit.

**DESIGNED TO WORK | BUILT TO LAST**

### Other Standard Features

- Custom bay configuration to spec
- One-piece aluminum roof
- Heavy duty rubrails
- Heavy duty aluminum rear bumper
- Bay depth 42"
- Standard door openings 76"
- All ICC lights, high/low stoplights & turn signals
- Aerodynamically designed roof rail
- All welded internal construction
- Prime painted
- Electric back-up alarm
- 2.5" floor pitch

Flip-Down steps on Mini Bodies, for sure footing

### Optional Features

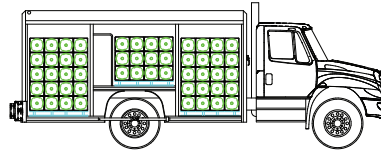

- Custom door openings
- 45" deep bays
- Adjustable hinged shelves for dividing bays
- Heating systems
- Hand truck racks
- Cooler compartments
- Custom painting & lettering
- Decal applications
- Felt side liners in door track
- Additional 3/16" aluminum plate on floor & bay-back
- Door panel reinforcements
- Backup camera system
- Pull-out/fold-out steps
- Door Openings 82"
